

Stories take shape.

LAMP is an independent film production studio founded in Milan in 2013. We develop original films, bringing writing, production and post-production into one creative process.

Original cinema

Genre films, contemporary drama and documentaries. We seek production and co-production partners for projects developed by the studio.

Post-production

Complex edits and large archives: media organisation, editing, VFX, colour and sound, through to delivery.

Cinema and enterprise

Le pietre d'angolo explores the history of the family business Fortunati Stocchi through its people and work. LAMP: executive production, post-production and finishing.
